

FREE AND DISCOUNTED TRAVEL ON TRAINS FOR CHILDREN

RENFE Discount on Long Distance, Avant and Conventional Medium Distance Travel.

Children under 14 years old occupying a space 40% discount on General / Base Rate. This discount is applicable every day in all classes and trains.

In general it will not be necessary to accredit the age of the child, although during the trip when there is reasonable doubt about the age of the child, the accompanying adult may be asked to produce an official document certifying the child's age.

Children under 4 years old who do not occupy a seat travel free.

Children under 4 years sharing a seat with anyone over 4 years I am told also travel free.

In the AVE, Long Distance and Avant trains, children under 4 years and sharing a place travel free, must have the corresponding "free child ticket."

Regardless of age, if children share seats, beds or bunks they can only be occupied by a maximum of two people.

Tourist bed sharing will only be permitted in family mode i.e. when both spaces are filled by people from the same group.

In the ticket office, make sure the necessary information of the accompanying children is displayed on both tickets.

The "free child ticket" must be accompanied by a paying passenger ticket.

In addition, children under 4 years occupying a seat may travel purchasing a ticket with a "Child" Tariff.

This above tariff applies to every day in all classes and trains.

Short neighbourhood distances:

Up to 2 children under six years can travel free provided they do not occupy a seat, except where children's discounts are permitted on short journeys and tickets are normally paid from age 4.

The discount cannot be combined with any other except in the case of special tickets available to large families and those passengers specifically entitled to discounts.
